

What is the Cataloging Record Distribution Pilot Profile?

This pilot profile must be completed by all libraries who wish to be selected to participate in the pilot project. This pilot profile will be set up with MARCIVE and is separate from any existing MARCIVE profiles that your library may have. Because the pilot profile is separate from GPO's Item Selection Profiles, normal depository distribution shipments will not be affected by the pilot project. Libraries will continue to receive depository materials according to their established GPO's Item Selection Profiles.
